12.07.2017

Everton E. C. Lima<sup>1</sup> and Kryštof Zeman<sup>2</sup>

#### **SURVEY**

The 2002 Population Census of Paraguay, based on the reference day 28.08.2002, was conducted between 28.08.2002 and 12.09.2002. It included all residents. The data in the database come from IPUMS International and they are a 10% sub-sample of the census. For more details on the census and on the 10% sample fraction please visit [https://international.ipums.org/international-action/sample\\_details/country/py#py2002a](https://international.ipums.org/international-action/sample_details/country/py#py2002a)

#### **EDUCATION**

The education level given in the database refers to the highest education attained by the time of the census. The original education categories have been coded into the ISCED-97 classification as follows:

value	Original	ISCED	CFE 3 categories
1	Less than primary completed	ISCED 0–1	1
2	Primary completed	ISCED 2	1
3	Secondary completed	ISCED 3–4	2
4	University completed	ISCED 5–6	3
9	Unknown	Unknown	Unknown

#### **AGE AND COHORT**

All data are tabulated by single birth cohort of women. However, due to the sample size users are strongly recommended to aggregate birth cohorts (e.g. into five-year groups) when conducting analyses of censuses 2002.

## **UNKNOWN CASES**

There were 18,755.75 (1.16%) and 64,610.81 (3.98%) cases of unknown education and number of children, respectively. There were no cases of unknown age of the respondent.

## **ACKNOWLEDGEMENTS**

We are grateful to Minnesota Population Center for a permission to redistribute the IPUMS data from census 2002. The original data were provided to the IPUMS database by General Directorate of Statistics, Surveys, and Censuses (DGEEC).

Lima's contribution was funded by the JESH – Joint Excellence in Science and Humanities under the grant provided by the Austrian Academy of Science.

CFE database is part of the EURREP project which is funded by the European Research Council under the European Union's Seventh Framework Programme (FP7/2007-2013) / ERC Grant agreement № 284238.
